DETAILED ACTION

Drawings

1. The drawings filed December 8, 2003 appear to be formal and are acceptable.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Straub on December 7, 2004.

The application has been amended as follows:

In the claims:

In claim 12 (second occurrence), line 1; change "12" to - - 13 - -.

In claim 13, line 1; change "13" to - - 23 - -.

In claim 22, line 1; change "28" to - - 18 - -.

Allowable Subject Matter

3. Claims 1-23 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The prior art fails to render obvious the claimed method for facilitating detection of a threat including, inter alia, operating a transmitter to transmit signals in the direction of a plurality of cells corresponding to different ranges relative to the transmitter to pan a scene, operating a detector to detect reflected signals during an analysis period received from the plurality of cells, determining a threat reference threshold for the analysis period as a function of the reflected signals detected during the analysis period by measuring detected reflected signals from the plurality of cells to generate a measured signal value for each particular one of the cells, modifying the measured signal values corresponding to some particular ones of said at least some cells by a distance factor corresponding to the distance the particular one of the cells is from the transmitter to generate a modified measured signal value for each of said some particular ones of said cells, and generating the threat reference threshold as a function of at least some of the modified measured signal values. The prior art does show detecting a threat using a radar system. However the present invention, as claimed, cannot be fairly rendered obvious by the prior art. One of the advantages of the present invention is that the threat threshold level is normally generated to be higher than the weighted energy average, e.g., by a fixed or user adjustable amount, to reduce the risk of threats being declared erroneously.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

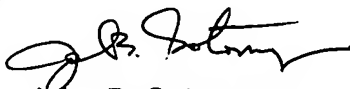

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John B. Sotomayor whose telephone number is 703-306-4170. The examiner can normally be reached on Monday to Thursday from 8:30AM to 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom H. Tarcza, can be reached on 703-306-4171. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
